

# Qualitypolicy

All products and services delivered must be of such quality that they satisfy the customer's requirements and on time.

Our quality and delivery reliability should be essential reasons for choosing our production resources.

ITE FABRIKS AB is perceived to be in line with the best of our competitors.

We will achieve this by:

- Continuously improve our processes and production methods.
- Together with our customers, actively develop and customize products and services.
- Annual updated action plans.

All our employees must be aware of the importance of quality. The quality system implies a commitment for all employees. Each employee is responsible for the fact that the service or service he leaves further meets the required requirements.

The staff must have sufficient knowledge and competence to meet the company's quality objectives within their limits.

There must be well-functioning documentation, organization and division of responsibilities regarding activities that affect product quality.

Quality work shall be conducted at all levels and monitored continuously.

Methods and tools that ensure the intended quality should be used.

These methods should be well-proven and documented.

ITE FABRIKS AB's quality activities are governed by a quality system that meets the requirements of the IATF standard: 16949 and ISO9001:2015
